Q. How much money can I earn?

A. From the start, you'll earn 25% on everything you sell. When you sell over \$2000 in a month, you'll earn 28% (regular commission plus a 3% bonus)! You'll take home an average income* of \$112 for every Party you do. You choose your income – by choosing how much to 'work' your business, you control how much you earn. An average of 1 Party per week means you'll earn an average* of more than over \$500 extra each month!

| Party Sales | Your Income |
|-------------|---------------------------|
| \$400 | \$100 |
| \$750 | \$187.50 |
| \$2,000 | \$560 (includes 3% bonus) |

I began Epicure as a busy working mother of two, looking for quick, healthy and affordable ways to nourish my family.

Dissatisfied with unhealthy store-bought products, I created my own time-saving spice blends. Their popularity with family and friends inspired me to start selling at local markets from the back of my blue station wagon. My initial "line" of 4 blends soon grew to include an extensive selection of spices and other food products, time-saving recipes, quality cookware and environmentally friendly home and body care products – all made to help the home chef discover the joys of cooking and eating delicious homemade meals.

Since 1996, we've shared our products through a national network of Independent Epicure Consultants at Epicure Tasting Parties™. Today, my daughter Amelia and I are proud of Epicure's success as a leading 100% Canadian, women-led, community-minded company, passionate about creating business opportunities and making the 'good life' easier for Canadians. **Welcome to Epicure!**
